

Let's join ! NPO

In our society, there are a lot of issues and problems that the administration and businesses do not deal with. Civic activity can solve these problems.

There are two forms of NPO; a voluntary association or a non-profit corporation. There are various steps to organize a group. For example ...

- ...plan the purpose & project of the organization
- ...plan the projects of the year
- ...make a budget for the projects
- ...make the rules
- ...name the organization
- ...gather members

Consider these items with group members, and then try to start the activity. When you have questions about the establishment or management of your NGO ...

The Keywords for NPOs are "public interest" and "non-profit". NPOs include volunteer organizations and NGOs.

non-profit

Money left over except from necessary expenses, must be used for the next project. (Prohibition of distribution)

public interest

The benefit of the activity is transmitted to an unspecified number of people.

Sapporo Public Support Network (Sapo-net)

Please use our consultation for NPOs !
We provide the consultation for NPOs, in order to support the establishment and operation of NPOs. When you have questions about the establishment and management of your NPO, please visit us !
